Universal Aerobic Step System

KIN-WMC

for use with: Wii fit Balance Board | PlayStation® Move | Kinect™

Give your aerobic workout an extra boost with the Universal Aerobic Step System for the Wii Fit Balance Board, PlayStation® Move, and XBOX 360™ Kinect. The Universal Aerobic Step System functions as a 2 leveled aerobic step for the PlayStation® Move and XBOX 360™ Kinect, but also elevates your Wii Fit Balance Board to a full 4 inches, a standard height for actual step aerobics. The platform adjusts to two different height levels with ease. By either placing the step flat horizontally or turning it on its side vertically, the step height is taken from 3 to 6 inches in height. For a secure grip the platform has rubber pads on the bottom and both sides. With the Universal Aerobic Step System you'll be performing step aerobics exercises just like you would at the gym, but with out the expensive membership.

Features include:
- Attaches to the bottom of the Wii Fit™ Balance Board.
- Can be used as regular aerobic step platform with PS® Move and Kinect.
- Rubber pegs under and on the sides of the platform.
- Adjusts from 3 inches to 6 inches in height.

Specifications:
- Three different options for use.
- Use with or without Balance Board on top.
- Gym quality work out at home.
- Very stable and durable.

Package includes:
- (1) Multi Step Platform
- (2) Support tubs
- (1) Central support system

**Wii Balance Board™, PS Move, and Kinect not included.*
